

## Custom-designed and manufactured to meet your desired specifications

When you can't find exactly what you need, we can help. If you need to replace an existing gearbox that's obsolete or out of production, we can design and manufacture a new matching drop-in unit. As a more cost-effective alternative, we can also canvas the surplus market for a housing to use in the rebuild. Either way, a drop-in unit will reduce your installation costs by enabling you to keep your existing baseplate and foundation, shorten your installation time and allow you to use the parts in your current inventory. Or if you have requirements for a new gearbox that can't be met by an off-the-shelf unit, we can design and manufacture a custom unit that will do exactly what you need.

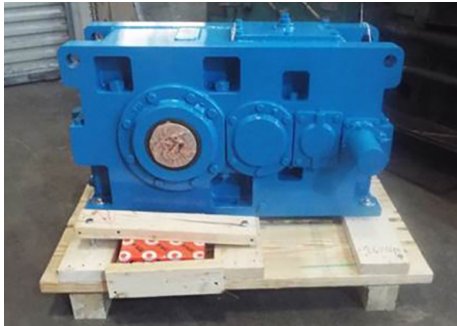

*Custom Nipco gearbox for paper mill*

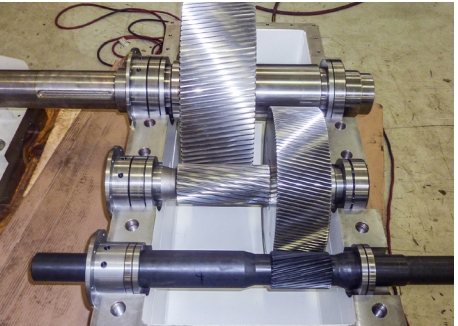

*Custom dam gate gearbox*

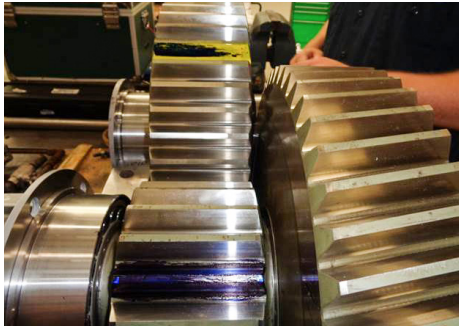

*Custom straightener gearbox for steel mill*

*Custom extruder gearbox for tire plant*

*Custom dam gate gearbox, inside*

*Custom straightener gearbox for steel mill, inside*
