

# East Haven's new yard had multiple site challenges.

So, we presented multiple solutions.

To transform their new location in Manchester, CT, into a customer-focused facility, East Haven Builders Supply had to deal with a small, oddly shaped site and an impractical existing warehouse. Each challenge required unique turnkey solutions – from a new bin system, mezzanine, pallet racks and A-frame racks in the warehouse to a new 3-sided shed, T-shed and L-shed in the yard – all of which we built into one high-performing location.
